This is a research library facility. Please come to the Center with your goal written on a Research log.

The Family History Library in Salt Lake City possesses the largest collections of family history records in the world, and the collection is truly international in scope. The holdings are organized primarily with the needs of the genealogist in mind. The Family History Library started its collection in 1894. Most of the records are from a microfilm project begun in 1938. The library contains more than 2.4 million rolls of microfilm, 742,000 microfiche, 300,000 books and 4,500 periodicals. This is increased monthly by about 4,100 rolls of film and 700 books.

In an ambitious "One Library" concept, all of the 4,000 + branch Family History Centers are linked by Internet access. Currently in this Center, in addition to being able to order film and fiche materials from the main library, we have several research aids, including the following computer databases and software:

- » LDS International Ordinance Index
- » TempleReady for Windows
- » FamilySearch.org resources and DSL Internet access to thousands of other family history resource sites
